

Luis working the finish of the concrete

Most of the team went and toured the Main fort on the island in the morning. The rest of us split up and put the toilets and exhaust pipes on the three latrines. Then we came back and grabbed supplies. We went and dug one more hole for the fence wall.

Setting up and waiting

That afternoon, we went and poured our last floor. After getting the concrete mix correct, we got the pouring done quickly. It was a very nice finish to the week.

The finished floor

That evening we took time to relax. We had fellowship with the mission staff and bought some jewelry made by the mission.

Relaxing with friends

Buying to support the missionaries
