

Jesse and Sam working on the wall

Most of the team went over to the feeding center. With the climate on the island pain degrades and mildews quick. We scrapped the walls and repainted them. Vic Costello also worked on cleaning and protecting a mural done by Dale Johnson (and our team) [2 years ago](#).

Scraping and cleaning

Val painting the wall

Gabriel doing the high painting

Vic and Leni at work

At the same time part of the group worked on building forms for the wall bases at the cistern site.

Nate working on the forms

Thom working on the boards

That night we had a free night and enjoyed games and Sam Costello and Jesse Fox played some music for us.
